## February NEWSLETTER

### PARENT WORKSHOP

Dear Parents,

We are excited to host our second online Parent Workshop and we cannot wait to see you then! Our Speech-Language Pathologist is excited to present on the importance of speech-language development and early literacy in the early years!

If you are unable to join us for the workshop we will share a link on our [website](#).

### Things To Know

Now that your child has been working on their IPP goals for a few months, BCESA recommends checking in with your **family doctor** to review your child's progress with development and milestones. It is also a good time to get your child's **vision & hearing** checked.

### Calendar

- Therapy visits continue
- FEB 12 Parent Workshop
- FEB 14 Valentines Day
- FEB 17 Family Day

### Reminders

Parent IPP meetings for **PUF** children (codes 42/44/47) will begin early next month with goal progress and updates. Look for an email with more information.

**Moderate-Language** and **Mild Moderate** children's IPP goals go until June. At any time parents are welcome to reach out to the team.

As always, when the therapists (SLP/OT/BHS) visit your child in the classroom a **contact note** will be shared with you outlining the goals they are focusing on and activities they have done with your child.
